

MASTER LIST OF CONTROLLED ASC-MSC CERTIFICATION PROGRAM DOCUMENTS (v4.0)

Intent

To provide a controlled, up-to-date and comprehensive listing of current and superseded ASC-MSC certification program documents for reference by Conformity Assessment Bodies (CAB) and Accreditation Services International. The certification program documents include the standard, certification requirements, associated checklists and templates.

Format

This controlled document list is set out in two tables listing the documents that comprise the ASC-MSC certification program documents. Table 1 lists current documents, and Table 2 lists superseded documents. The previous version of a document will be moved to Table 2 upon the date that the new version of the document becomes effective. Note that due to implementation timeframes, a superseded document may still be applicable in some audits.
